

Mahmoud Eisa Abdelgadir

Business Information Systems Student

Cairo, Egypt | +20 155 755 8896 | mahmoudekgadir123@gmail.com | linkedin.com/in/mahmoud-eisa-

PROFESSIONAL SUMMARY

Third-year Business Information Systems student at AASTMT (GPA 3.63/4.0) and graduate of a 90-hour Data Analysis Training Program, with hands-on experience in SQL data modeling, Power BI, Python analytics, and machine learning, alongside full-stack web development and financial statement analysis of an EGX-listed company. Trilingual in Arabic, English, and French, highly analytical and detail-oriented, and a clear communicator across technical, financial, and business-facing teams.

SKILLS

Programming & Databases: Python (pandas, NumPy, scikit-learn, Matplotlib, Seaborn), SQL & T-SQL, Microsoft SQL Server (SSMS), MySQL, Microsoft Access, HTML, CSS, PHP, information systems analysis

Data Analysis & Machine Learning: Exploratory data analysis (univariate, bivariate, multivariate), data cleaning & quality assessment, IQR outlier detection, missing-data handling (MCAR/MAR/MNAR), feature engineering, Logistic Regression, train/test validation, class-imbalance handling, model evaluation (confusion matrix, precision/recall)

Business Intelligence: Power BI (DAX, Power Query), star-schema & dimensional modeling, ETL, executive KPI dashboards

Financial Analysis: Financial statement & ratio analysis, DuPont decomposition, market value multiples (P/E, P/S, M/B), quantitative research design, statistical analysis (IBM SPSS)

Soft Skills: Communication, teamwork, cross-functional collaboration, adaptability, attention to detail, organizational skills

Languages: Arabic (Native), English (Fluent/Professional), French (DELFL Certified)

PROJECTS

End-to-End E-Commerce Delivery Analytics — Olist Brazilian Marketplace 2026

Capstone Project, Data Analysis Training Program (EncryptCore) — SQL Server, Power BI, Python

- Modeled 99,441 orders from 9 source tables into a SQL Server star schema, building fact and dimension views with CTEs and DATEDIFF logic to derive the delivery-lag and late-delivery metrics reused across every downstream tool
- Built a Power BI dashboard over a 7-table model with DAX measures (Total Revenue, Order Frequency, Avg Delivery Lag, YTD Sales), and ran a five-stage Python EDA linking a -0.33 lag/review correlation to 5,025 outlier orders in Brazil's remote north
- Trained a Logistic Regression classifier to flag late-delivery risk pre-shipment: removed a leaking feature, diagnosed a 91.9%-accuracy baseline that caught none of the 1,561 late orders, and applied class weighting to recall 51% of them; delivered a two-page executive summary

Financial Ratio Analysis — Talaat Moustafa Group (TMG) Semester 4, 2025

Financial Management Course — Consolidated Financial Statements Analysis

- Analyzed the full set of liquidity, solvency, turnover, profitability, and market-value ratios for one fiscal year of TMG's consolidated statements, applying DuPont decomposition and growth-rate models to explain shifts in ROE and evaluate capital structure strategy

Campus Lost & Found Website (Self-Initiated) 2026

Personal Project — HTML, CSS, PHP, MySQL

- Independently designed and built a lost-and-found web platform for the college campus outside any coursework, using PHP, MySQL, and PDO parameterized queries, with password hashing, session-based roles, owner/admin-only access control, dynamic search filters, and validated image uploads

Dafa Furniture Website Semester 5, 2026

Web Programming & Web Design Course — HTML, CSS, PHP, SQL, MySQL

- Built a multi-page e-commerce website integrating front-end UI with a PHP back end and a MySQL/Apache database
- Solved a recurring navigation bug by refactoring the navbar into a reusable include, cutting duplicate code

EDUCATION

Bachelor of Business Information Systems (BIS) 2024 – Present

Arab Academy for Science, Technology & Maritime Transport (AASTMT), Cairo, Egypt

- Third year, Semester 6; expected graduation 2027; GPA 3.63/4.0
- Relevant coursework: Database Systems, Multimedia Design, Web Development, Information Systems Analysis

IGCSE, Secondary Education Graduated 2022

Unity High School, Sudan

CERTIFICATIONS

- Data Analysis Training Program (90 Hours) — EncryptCore, 2026 (Python, SQL, and Power BI)
- DELFL French Language Certificate — Alliance Française
- IGCSE Certificate — Cambridge Assessment International Education
